Outline Safer Recruitment Procedures – MIST guidance to schools

This guidance does not replace the detailed procedures that must be in operation in each school and subject to inspection under ISI and DfE standards as may be updated from time to time. The purpose of the guidance in this note is to offer schools a summary check-list of things that should be in place that will enable schools in the MIST group to discharge their safer recruitment responsibilities but does not supersede that fact that it is each school's responsibility to ensure that they operate in accordance with the most recent guidance issued by the DfE and ISI.

Making safeguarding and promoting the welfare of children an integral factor in HR management is an essential part of creating safe environments for children and young people.

A school's policy and procedure for safer recruitment must:

- Apply to all appointments including volunteers and governors, temporary agency/contract staff and employees who even though they may not have unsupervised access to children may be assumed to be trustworthy and safe because of their regular presence in the school.
- Have a clearly evidenced record of recruitment checks, interview notes and training including but not limited to complete and accurate completion of the staff central register (SCR).
- Be scrutinised on a not less than annual basis by governors or the nominated governor for safeguarding and reported formally to governors accordingly

1. The recruitment process

- The advert for any vacancy will emphasise that the school is committed to safeguarding and promoting the welfare of children and expects all staff and volunteers to share this commitment
- Such information should be highlighted in advertisements for vacancies, candidate information packs and job descriptions
- Any appointment should require the completion of a standard application form to ensure all relevant information about every applicant is collected prior to interview and/or prior to appointment
- No appointment should be made in a school without at least two written references being received and checked/authenticated. This should be in accordance with KCSiE (Keeping Children Safe in Education, 2016 and any updates as may be published). Wherever possible at least one reference should be taken up and read prior to interview. References need to be provided directly by a referee; need to be scrutinised, cross-referenced against other application details and authenticated. Written records of these checks need to be kept.

2. The appointment process

Assuming the application form and references have been collected and authenticated as per guidance above then additionally any appointment must be conditional upon:

- Face to face interviews to include appropriate questions about child protection and safeguarding.
- Interviews should be conducted by suitable staff, at least one of whom, should have completed safer recruitment training
- Candidates must be requested to provide a full employment history since leaving full time education. Any gaps in the work history must be checked and completed at interview.
- Personal ID and qualifications should be checked.
- Staff working in EYFS or “later years” childcare must confirm that they are aware of their duty to disclose any information that would disqualify them from childcare and/or complete a staff disqualification declaration.
- Satisfactory DBS enhanced check
- For regulated activity a check of the relevant barred list(s)
- Evidence should be provided that the candidate has the right to work in the UK
- For all staff in teaching work there must be a check against the NCTL prohibited list and for staff appointed to a management position (and governors) a check must be made against the Section 128 list as per the Education & Skills Act 2008
- For staff that have lived or worked abroad in the last 10 years, additional overseas checks as required by the Home Office or considered relevant on a case by case basis, eg overseas police certificate, EEA check (teachers only), overseas references
- All checks must be recorded in writing and logged in the SCR in accordance with the prescribed format and each staff file should also record the checks and evidence seen and recorded prior to or on appointment
- For staff living in school accommodation, schools must make the appropriate checks of other adults (family members) in that accommodation and provide suitable guidance which may include an explicit code of conduct
- Satisfactory completion of the school’s probationary period (which should be considered an important part of the appointment process)
- Particular and explicit attention should be paid to training and guidance when employing a close family member – MIST’s SSRA (2016) offered some general guidance on this issue that schools should take into account.

3. The induction process

Regardless of prior experience each school will provide an induction and training programme for newly appointed staff (and volunteers) that will, as a minimum:

- Provide training and guidance on school specific policy and procedures including the Child Protection policy and arrangements, whistleblowing and staff code of conduct/safe working practice.
- Support appointees to ensure their best possible preparation for the role to which they have been appointed
- Provide opportunities for new staff to discuss any issues of concern and seek clarification of any matter requiring fuller explanation
- Enable the line manager to assess the need for and focus of a bespoke induction and support programme for the new employee
- Set out agreed procedures for mentoring and evaluation of progress required before any confirmation of a new employee’s probationary period

4. Ongoing training

Even after the probationary period is complete, all staff should receive regular updates on safeguarding and child protection, reminders about protocols and procedures for early help, cause for concern and for whistle-blowing. This will include, in due course, MIST-wide guidance on low-level concerns as raised in both SSRA (2016) and the Petroshka Report (2017).

5. Keeping Children Safe in Education

In addition to the procedures and steps summarised above each school must ensure that its employees and governors read the statutory guidance provided in *Keeping children safe in education* (and associated guidance e.g. "Working Together"). This information provides essential information for HR managers and staff involved in any staff appointment in respect of matters including:

- Single Central Record
- Regulated Activity
- DBS and other vetting checks
- Dealing with allegations of abuse against staff and volunteers
- Confidentiality
- Settlement agreements
- Record keeping
- Referrals to LA designated officers (LADO), the Disclosure & Barring Service and the National College of Teaching and Leadership (NCTL)
- False allegations

In addition, the Trust, school leaders and governing bodies will ensure that a range of mechanisms are in place to enable staff and governors to understand their responsibilities for safeguarding and child protection

MIST requires that all schools review their safer recruitment policy annually, includes a report on that review to governors and reports its findings in the MIST annual school report (ASR).
